POOCH POUCH

January 11, 2004

The **POOCH POUCH** is a proportionate cover for an Animal's ID tags to completely eliminate noise from the pets ID tags. The Pooch Pouch is extremely convenient, and completely eliminates any noise, or jingling from your animal's ID tags.

The Pooch Pouch is an extremely durable stretchable clear plastic that will be heat sealed with a machine sealer. The Pooch Pouch is heat sealed on the sides with the bottom of the pouch completely open and a slit in the top of the pouch to fit the clip from the Animal's ID tag, and collar. The Pooch Pouch slides over the Animal's ID tags.

The Pooch Pouch allows you to have quiet in your home, whether trying to sleep, read a book, not bothering your sleeping baby, going to the washroom, not even bothering your pet. You never have to hear jingling again from your animal's tags.

The Invention came about when my little 10 pound Miniature Pinscher dog was making so much noise with his dog tags when I was trying to relax, read a book, or anything that required quiet. So I thought it would be so great to invent a clear, chewable proof plastic to put over the Dog's ID tags so they don't jingle.

So I invented the Pooch Pouch and I am so excited there is so much more quiet. I am so excited that I can make the Pooch Pouch into different colors for girl dogs and boy dogs, decorate them with rhinestones, and monogram them for dogs. I am so excited I can enjoy the quiet, and my dog can do anything without disturbing me.
